What does Home Theater PC do to make your home entertainment better?

Schedule show time on your own time

With Omicron Home Theater PC, TV time is whenever you say it is. You can watch your favorite digital content in high definition (available only in the U.S.)—with the ability to pause, rewind, and schedule recording for later viewing at your convenience.¹

Big, beautiful photos and videos

Omicron Home Theater PC makes it easy to view, organize, and share your memories with friends and family. Look at photos or watch videos on your PC monitor, or on the most important screen in your house: your television.

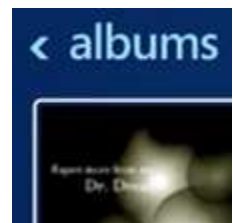

Make any room a media room

Take Omicron Home Theater PC to the next level and enjoy your favorite live and recorded TV shows, movies, music, and pictures on TVs throughout your home with remote control convenience using an Extender for Windows Media Center.

Music that's easy to find and play

Your music takes center stage with Omicron Home Theater PC and the music library displays the cover art for each album and song you own.

Diverse online entertainment

Windows Media Center's online services includes SportsLounge (U.S. and Canada only), where you can get the latest scores, stats, and upcoming televised game dates of your favorite teams. Online Media offers name-brand entertainment for you to watch and download. The Internet TV Beta (U.S. only) lets you watch television and video programs on demand.

¹Enjoying live and recorded HDTV (U.S. only) may require additional equipment, including but not limited to an HD compatible tuner and TV or other display.

***Reduced power consumption** - WD has reduced power consumption by up to 40 percent compared to competitors' drives with the combination of WD's IntelliSeek™, IntelliPark™, and IntelliPower™ technologies.

Helps enable eco-friendly PCs - WD Caviar GP drives yield average drive power savings of 4-5 watts over competitors' drives making it possible for our energy-conscious customers to build systems with higher capacities and the right balance of system performance, ensured reliability, and energy conservation. This power savings equates to reducing CO² emission by up to 13.8 kilograms per drive per year - the equivalent of taking a car off the road for 3 days each year*. By using environmentally-conscious PCs with our WD Caviar GP drives on board, large organizations with many desktop computers can minimize their carbon footprint and save real money on electricity costs.

** 80 PLUS is the highest independently certified standard in energy efficiency! 80 PLUS products lower your electric bill and protect the environment with no reduction in performance.
